Currently our company is implementing projects FPSO / FSO projects and other oil and gas services. To facilitate the development of projects, we are looking for recruiting the following positions:

1) Personnel

- Manage the operation of the vessel systems at department level through supervisors and subordinate staff.
- Exercise appropriate authority with regard to career development, providing training and support in terms of competence assurance system.
- Ensure probationary and annual appraisals are completed fairly and consistently in timely manner.
- Manage welfare and disciplinary issues at departmental level with appropriate reference to Captain and HR.

2) Works

- Efficient operation of unit systems having due regard for Health and safety.
- Ensure full compliance with PTW system, and Risk assessment and verification.
- Ensure full compliance with Class, Flag and Port State requirements, preserving the vessel's operational status.
- Effective supervision of project, sub contract and vendor personnel.
- Efficiency improvement and pursuance of company goals.
- Responsible for condition monitoring, maintenance and repair of vessel and process systems.
- Manage parts control, inventories storage record keeping, shipping and receiving by use of maintenance plan or maintenance software application.

3) Contract

- Manage operations in conjunction with all department heads to maximize efficiency and uptime.
- Maintain effective cost control and promote cost awareness in others.
- Maintain awareness of key issues relating to client and sub contractor relationships.

Job Requirement:

- Work experience: 5 years
- Minimum education level: Bachelors of technology
- Applicable to Master Mariner, or Engineer Class 1, with extensive Oil Tanker experience, or five years experience as a Production Superintendent of an FPSO
- A minimum of 3 years experience associated with offshore production floating facilities in a supervisory/management capacity
- Conscientious, flexible, versatile and determined. Capable of assertive and positive communication and performance
- Exemplary safety and managerial leadership skills. Good levels of written and spoken communication in English language. Clear understanding of personnel, behavioral and team issues.
- Appropriate standard of managerial, technical, and professional knowledge as defined by competences
- Good knowledge and skill with 'Maintenance Management System' interface. Practical familiarity with standard 'Office' software package.
- Operation and use of Internet and electronic mail system
- Significant knowledge of Marine, Production and Engineering and Maintenance Management to be able to manage all aspects of the FPSO operation

Language: English (fluently)
